## DISCOUNT POLICY FOR MANUALS AND HANDBOOKS

1. Only ten or more **like** manuals with a price are eligible for a discount.

2. Quantity DISCOUNTS are granted based on the following formula:

NUMBER OF ELIGIBLE COPIES	DISCOUNT TO NON-PROFIT EDUCATIONAL INSTITUTIONS	DISCOUNT TO OTHER CUSTOMERS
1-9	0%	0%
10-29	10%	0%
30-149	20%	10%
150-299	30%	15%
300-449	35%	20%
450 or more	40%	25%

3. Discounts apply only to quantities in a single order. Therefore, quantities are not cumulative over several orders.

4. Examples:

EXAMPLE 1: The purchase is:

Manual A = 9  
Manual B = 9  
Manual C = 9

Total = 27 (Total Eligible = 0)

Even though the purchase totals 27 manuals, the customer is **not eligible** for any discount because "only ten or more like manuals are eligible for a discount."

EXAMPLE 2:

Manual A = 9  
Manual B = 9  
Manual C = 30

Total = 48 (Total Eligible = 30)

The customer is eligible for a **30 manual discount.\*** Manuals A and B do not qualify for a discount.

EXAMPLE 3:

Manual A = 10  
Manual B = 10  
Manual C = 10

Total = 30 (Total Eligible = 30)

The customer is eligible for a **30 manual discount.\*** Each manual meets the minimum number for a discount.

\*30 manual discount equals 20% for Non-Profit Educational Institutions or 10% for all other customers.

Any discrepancies must be reported within 30 days A.R.O. Goods ordered and shipped may not be returned for credit.

**NOTE:** The following individual components of a software product are not discountable: Paper tapes, Cassettes, DECtapes, Magtapes, DECPacks, Paper and Micro-Fiche Listings, Floppy Diskettes and Reference Cards.

# SOFTWARE DOCUMENTATION

## SOFTWARE DOCUMENTATION

### SOFTWARE DOCUMENTATION

#### SOFTWARE DOCUMENTATION

## **SOFTWARE DOCUMENTATION**

Documentation for all current PDP-8-11-10-20 software products is listed in this section.

Documentation is listed by title followed by order number. PLEASE REFERENCE THE MANUALS YOU SELECT BY ORDER NUMBER.

You may also note a *Part Number* in the far right hand column. We are in the process of converting all part numbers to order numbers.

In some cases the manual you receive will show only the part number. This is because the number is physically converted only at the time of reprinting. The text is identical regardless of which number appears on the document.

Order numbers contain a character that will help you determine which revision the manual is in.

For example:  
AA-2644A-TC

The underlined letter A designates that this manual is a first printing. A letter B would designate a first revision, C a second revision etc.

If you require information on replacement software, please contact your local sales office for assistance.

A black and white photograph of a spiral-bound manual. The cover is made of a textured material, possibly cloth or heavy paper. The title "HARDWARE MANUALS" is printed in large, bold, sans-serif capital letters across the top half of the cover. Below the title, there is smaller, less legible text that appears to be a subtitle or a part number, ending in "S". The spiral binding is visible along the right edge of the cover.

## **HARDWARE MANUALS**

The last two digits of the part number on hardware manuals indicate the type of manual. The basic types are as follows:

**IN** Installation and Acceptance  
**IP** Illustrated Parts Breakdown  
**MM** Maintenance Manual  
**OP** Operators Manual  
**TM** Training Manual  
**UG** Users Guide

EK-OCORP-SP	DIGITAL SITE PREPARATION GUIDE	\$ 11.00

The image features a large, three-dimensional text graphic. The word "ENGINEERING DRAWINGS" is repeated three times in a perspective arrangement, creating a sense of depth. Each instance of the text is composed of numerous small, black, rectangular blocks or pixels. At the bottom of the graphic, there is a circular arrangement of smaller text labels, likely representing software names or tools used in engineering drawing, such as AutoCAD, SolidWorks, Inventor, SketchUp, Revit, CATIA, Pro/E, SolidEdge, Creo, NX, and Femap.

## **ENGINEERING DRAWINGS**

DIGITAL is in the process of converting the engineering drawing part numbering system. After some items you will see a code beginning MP\_\_\_\_\_. If this code is available, please use it as the part number. Otherwise, order by device.

The image features a large, faint watermark-like text "TECHNICAL DOCUMENTATION INDEX" repeated diagonally across the page. The text is in a bold, black, sans-serif font and is oriented at approximately a 45-degree angle from the bottom-left towards the top-right. The watermark is composed of several overlapping, slightly blurred instances of the same text, creating a sense of depth and repetition.
